

Recover deleted member from Backup (available in version 2.6 upwards)

Deleted members are available to recover (to add back into Gym Assistant) for 30 days from the date of deletion.

On the menu bar click Utilities/ Special Features/ Recover Member from Backup.

A list of your backups will be listed. Select a backup dated prior to when the member was deleted.

Once selected, a list of ALL members contained in that backup will appear.

Click on the member you wish to recover (to add back into Gym Assistant) then follow the prompts.
