

Pause check-ins from displaying in Gym Assistant

When members scan in either at the door or at a desk scanner, their information automatically appear in Gym Assistant to display the members' check-in status.

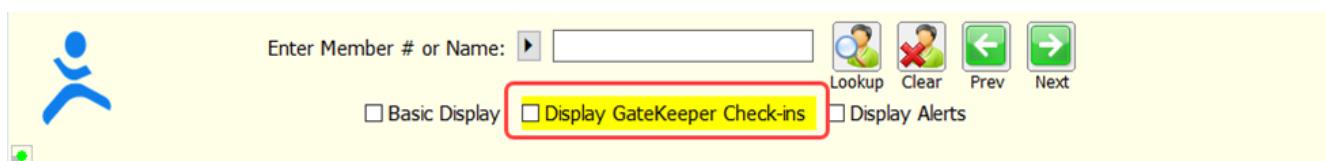

Should you need to pause these check-ins from popping up in Gym Assistant in order to perform "project" type tasks, for example making changes to numerous member records at one time:

- Uncheck "Display GateKeeper Check-ins" from the bottom of the member record.

The screenshot shows the 'View Member Info' window for member #797 Test Member. The member's name is displayed prominently at the top. Below the name, a green bar indicates 'Membership Up-to-Date'. The member's status is listed as 'ACTIVE'. The 'Billing' tab is selected, showing details like Billing Plan (test), Due Date (07/22/2025), and Current Balance (13.32). At the bottom of the main content area, there is a section for 'Display Options' with three checkboxes: 'Basic Display' (unchecked), 'Display GateKeeper Check-ins' (checked and highlighted with a red box), and 'Display Alerts' (unchecked). To the right of the main content, there is a sidebar with various links for member management and system monitoring.

- It will then be highlighted in yellow until you check the box again.

To the right of the main content, there is a sidebar with various links for member management and system monitoring.

- Member check-ins will still be logged as a visit even though it does not pop up on the screen.
